

Voyager™ PRO HD

So smart, it manages your calls

A Smart Headset for your smartphone

Target customer

They fully embrace the headset philosophy and are definitely extremely heavy users of headsets. As their travel burden is heavy, not just by car, but also by trains and planes, they need to keep in touch via voice. They expect high performance and excellent noise cancelling capabilities as they are working in some of the most noisy environments and public spaces. These users want to be kept entertained while on the go and therefore want a headset capable of streaming music, podcasts, GPS and more. But **performance** is absolutely the key for these users; they want the very best audio, the most comfortable design, the easiest to set up with advanced time saving features, thus helping them to squeeze the very most out of their day.
