

SMARTER BUSINESS ON THE MOVE

Professional mobile phone solutions for comfortable handsfree communication

It's official: offices are now mobile, and mobile phones have become offices. More and more businesses are switching from landline based telecoms to GSM/3G technology, which means broadband and voice on the move. Flat rate call pricing coupled with the benefit of a single number regardless of the user's location has become economically desirable for companies around the world – and having all that in the palm of their hands sounds perfect to most people. But to leave busy hands free; mobile office users need to close the gap between hand and ear. Who wants to hold a mobile phone to their head for hours on end?

The fact is, only a purpose built professional headset connected to your mobile via a Plantronics MO cable, can really transform a mobile phone into a full mobile office solution capable of being used as a direct replacement for the office deskphone.

By using a professional headset solution with a mobile or smart phone, it provides all the benefits of a professional headset – crystal clear sound, all day wearing comfort AND longer talk time with no charging needed.

Compatible with a wide variety of handset manufacturers including, Blackberry, iPhone, HTC, Nokia Samsung, Siemens and Sony Ericsson. The new MO range of headsets mean people in the know can stay in touch whilst moving their business forward.

Plantronics
Voyager® PRO

MO300™ Adapter
(Headset not included)

MO200™ Headset

Our new headsets for mobile phones and smart phones set new standards, leaving busy professionals free to move and work in comfort whilst continuing the call.

Plantronics Voyager® PRO – The difference is clear in every call

The new Plantronics Voyager PRO is the must have business tool for the busy mobile professional. Today's demands require conversations on the move and constant communication with the office. All of this often happens in noisy environments, when travelling from office to office or country to country. The Voyager PRO is designed to accommodate this pace of life and offers a total audio solution that won't let you down.

- Dual-microphone AudioQ² noise-cancelling technology enriches voice quality
- Three layers of protection from wind noise
- Durable headset withstands daily wear and tear
- Multipoint pairs one headset to two Bluetooth devices
- Voice prompts alert battery and mute status
- Fast charging battery provides up to 6 hours talktime

MO300 – For the busy 21st Century professional

The MO300 adapter offers the ultimate in handsfree mobility. This cable has a mobile handset connector on one end and a Plantronics QD with integrated hookswitch control on the other. When plugged into a EncorePro™ headset (which is required in addition to the cable) it provides outstanding audio quality, all-day comfort and ease of operation. This all combines to provide a headset solution designed for the most demanding of users.

- Choice of headset style including twin earpiece (binaural)
- All day comfort
- Integrated in-line call answer/end controls

MO200 – The complete headset solution

The MO200 is a mobile corded headset with in-line hookswitch and mute controls. An intelligent redesign of the highly successful DuoSet®, this headset picks up where it's predecessor left off. The MO200 is a convertible, this means it can be worn with an earloop, or with a headband. Either way it will feel comfortable, look good and sound even better.

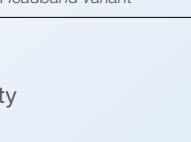

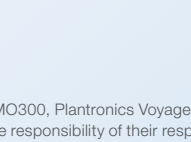

- Convertible wearing styles to suit all users
- Easy to carry and use
- Integrated in-line call answer/end and mute controls
